Sanctuary Lakes Resort

Exposed Aggregate is a very popular finish for concrete. This is produced by using decorative stones, colour oxides and cement, before exposing and sealing the surface to achieve the required finish

The driveway is both a functional and aesthetic part of your home. It is the entry to your home and the first thing both you and your neighbours look at. An exceptional driveway compliments its surroundings, its angles reflect those of the house, it compliments the soft landscaping (plants) and its colours compliment and add to the house.

***Disclaimer**

Aggregates used in Exposed Aggregate Concrete are natural products and can vary in colour, shape and size. These variations can also change the shade of the concrete. The images are only indicative and illustrative of the type of finish to be achieved and no guarantee is given that the finished product will be identical to these images.
